

WHY I STARTED MANGEL KLICKS – THE NEXT STEPS 2025 -2049

My name is **Charles Kwamena Ackon**. Please allow me to introduce myself and tell you about **Mangel Klicks Limited**, where I currently hold the positions of **CEO and Managing Director**. I started the company – Mangel Klicks Limited in the year 2007 and will serve as its CEO through 2025. Our company will expand into robotics, artificial intelligence (AI), pharmaceutical and biomedical engineering assembly plants, robotics software and apps, robotics-based healthcare clinics, and more in 2024–2049 built on the core values of QEICE – Quality, Excellence, Integrity, Compassion and Empathy as we enhance the 3-Thematic Concept of *“Enriching Lives Together.”*

In the next steps of Mangel Klicks, we are developing our **transformational change** on our clearly defined mission, mandate and agenda which provides a reliable, personalized, harmonized, and resourced purpose of development built upon the enlisted: 1. Sustainable Goals, Vision, Willingness,

Ability, Resources, Responsiveness, Business Focus, Strategic directions, Capacity building, and so on. And **to achieve quality and sustainable growth, people and infrastructural development by 2049, company management will continue with our business plans and strategies, channel partnerships and systems implementation to preserve and enhance the yields, gains and rewards of entrepreneurship, innovation and change management, among others, will be found in the results, opportunities, and gains that is earned from taking calculated risks based on conviction, ethics, hard work, cooperation, and so forth. Welcome to Mangel Klicks!**

DR. CHARLES KWAMENA ACKON
(Managing Director / CEO)

WHY I STARTED MANGEL KLICKS LIMITED ?

In AD 2004, I was inspired, convinced and also believed that I could make an impact on society by partnering with clients (colleagues, customers and investors) to ensure optimum care and satisfaction initially within West Africa by the year 2025. I realized from my international and national work experience that there was an increasing demand for variety and excellence and that this innovation was yet to be actively experienced in the healthcare market in Ghana. This frustrated me a lot. So in late 2004, I thus set out to open a company called MANGEL KLICKS to sell, service, innovate and promote a concept called “enriching lives together...” that focuses mainly on the provision of integrated healthcare systems through specialized, most current, reliable and evidence-based products and services using modern and elite knowhow in Pharmacy, Medical IT, Biomedical Engineering, Stepped Healthcare, Turnkey Hospital Projects, Counselling and Advice and to facilitate these with delivery of merchandise by transport services as well as employing highly skilled, motivated and well educated persons coupled with outstanding corporate presentations and Office Layouts among others.

The business focus, strategic objectives, plans and actions within the medium term developmental strategy and as stipulated within the set timelines (AD 2007 – 2025) continues to accelerate the growth of this business and attract international awards and respect through performance on our deliverables. MANGEL KLICKS is a people-centred organisation which is graciously enriching lives together... through the three thematic areas of Business, Ventures and Foundations premised on the core values of Quality, Growth and Excellence.

To God be the Glory!
